Raising **London Circuit**

ACT Government

Raising London Circuit is an important project in the ongoing evolution of Canberra's CBD. It will improve connectivity and enhance amenities between the city and lake, activate underutilised parts of City West and unlock opportunities for new precincts and public spaces.

Once complete, a raised London Circuit will transform the Southern end of the CBD into people-oriented streets for pedestrians, cyclists and public transport.

Raising London Circuit is also an important enabling project for the first 1.7km section of Light Rail to Woden between the City and Commonwealth Park. A raised London Circuit provides an at-grade intersection with Commonwealth Avenue for light rail and its passengers.

Amenity of the local area will be further improved by landscaping, with new trees planted along Commonwealth Avenue and London Circuit.

What's **happening now**

To minimise disruption, this project is being delivered in stages. In 2022 the moving of watermains and communications utilities (early works) will be completed. This will be followed by road improvements and signalisation work to facilitate traffic flow during the main construction. Then the main construction works on raising London Circuit get underway.

2021

Early works start

2022

Signalisation and roadworks

2022 main works start

2024

Raising London Circuit works completed

What's involved in raising London Circuit?

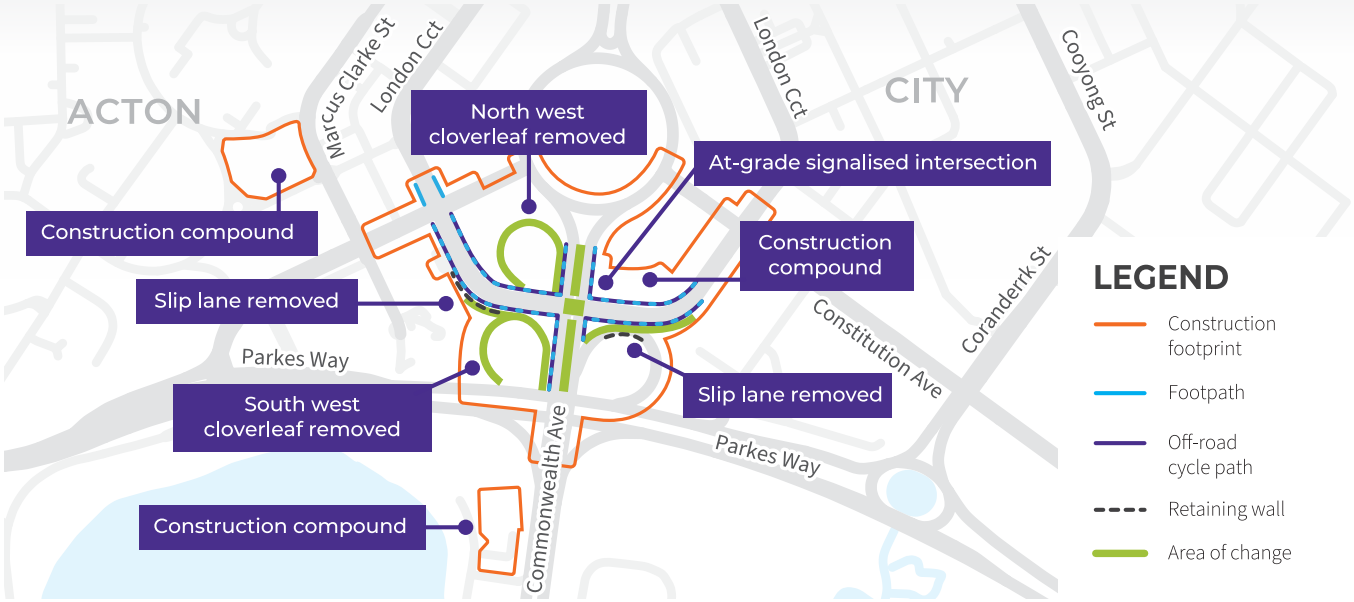

The Project will raise the height of London Circuit between Edinburgh Avenue and Constitution Avenue on a gradual filled embankment to meet the current height of Commonwealth Avenue.
It will include a new signalised intersection between London Circuit and Commonwealth Avenue.

This process will require the delivery of approximately 60,000 cubic metres of fill. This is the equivalent of 24 Olympic swimming pools.

A video explaining the construction works for raising London Circuit is available at **act.gov.au/lightrailtowoden**

Once completed the works will change the current split-level, overpass-underpass configuration into a more pedestrian and cyclist-friendly intersection by raising the London Circuit Road level on either side of Commonwealth Avenue.

Stay up to date – **Construction look-ahead**

With a section of London Circuit closed throughout construction there will be traffic delays. Detours and traffic and pedestrian management will be in place to minimise impacts.

To stay informed on construction activity and expected traffic and pedestrian impacts, sign up for the monthly construction look-ahead at **act.gov.au/lightrailtowoden/construction**.

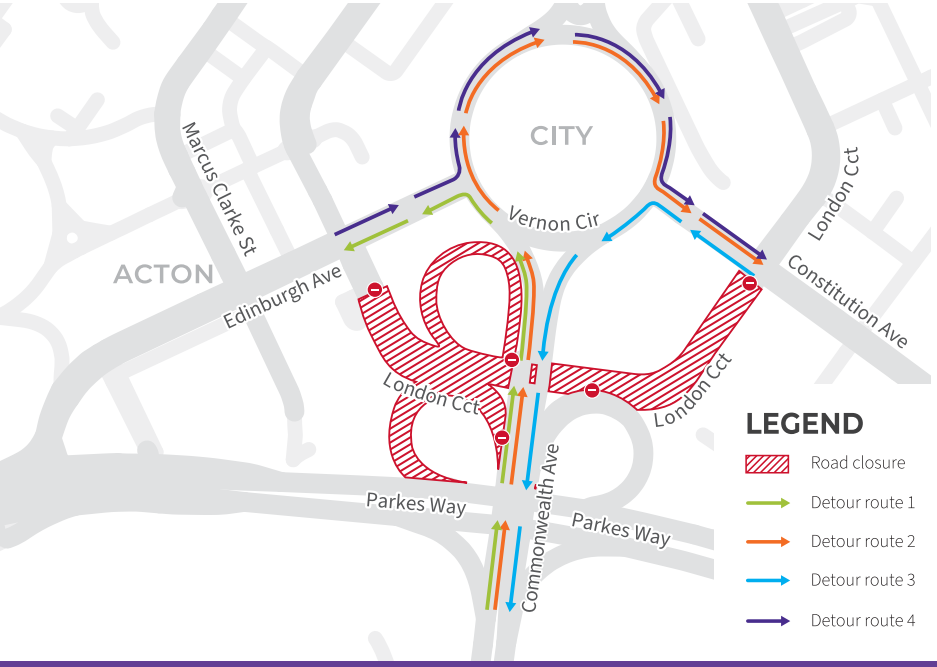

Working **hours**

General working hours are:

7:00am to **6:00pm** Monday to Friday

7:00am to **1:00pm** Saturday

At times out of hours or night works will be required. We will notify you in advance via the construction look-ahead. Stay up to date at **act.gov.au/lightrailtowoden**

Disruption **Taskforce**

Raising London Circuit is being delivered in parallel with other infrastructure works in and around Canberra's city centre that will cause disruption to traffic flows, public transport routes and active travel connections both in and out of the city. For information on how the ACT Government's Disruption Taskforce is overseeing a disruption management strategy go to **act.gov.au/lightrailtowoden**
